GDP102 Game Design Principles

Assessment 3:
Game context and Design principle

Outback Dash:
A Unique Endless Runner

Core Idea:
Players ride iconic animals like kangaroos, emus, and wombats to stop poachers and recover stolen artifacts.

Vision:
To create an engaging endless runner inspired by Australia’s wildlife and landscapes.

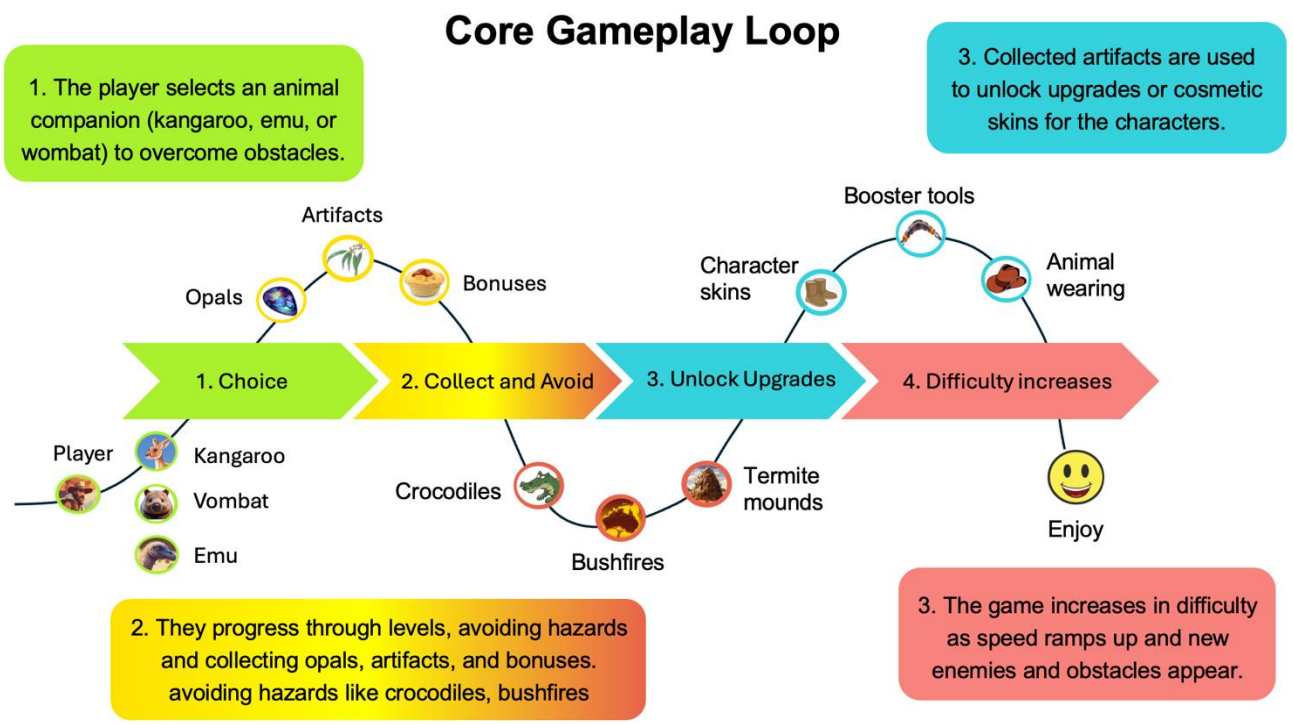
Design Philosophy Behind Outback Dash

Core Principles:

- Accessibility:
  Designed for both mobile and PC platforms.

- Engagement:
  Dynamic gameplay mechanics and vibrant visuals.

- Emotional Connection:
  Focus on protecting wildlife and restoring balance.



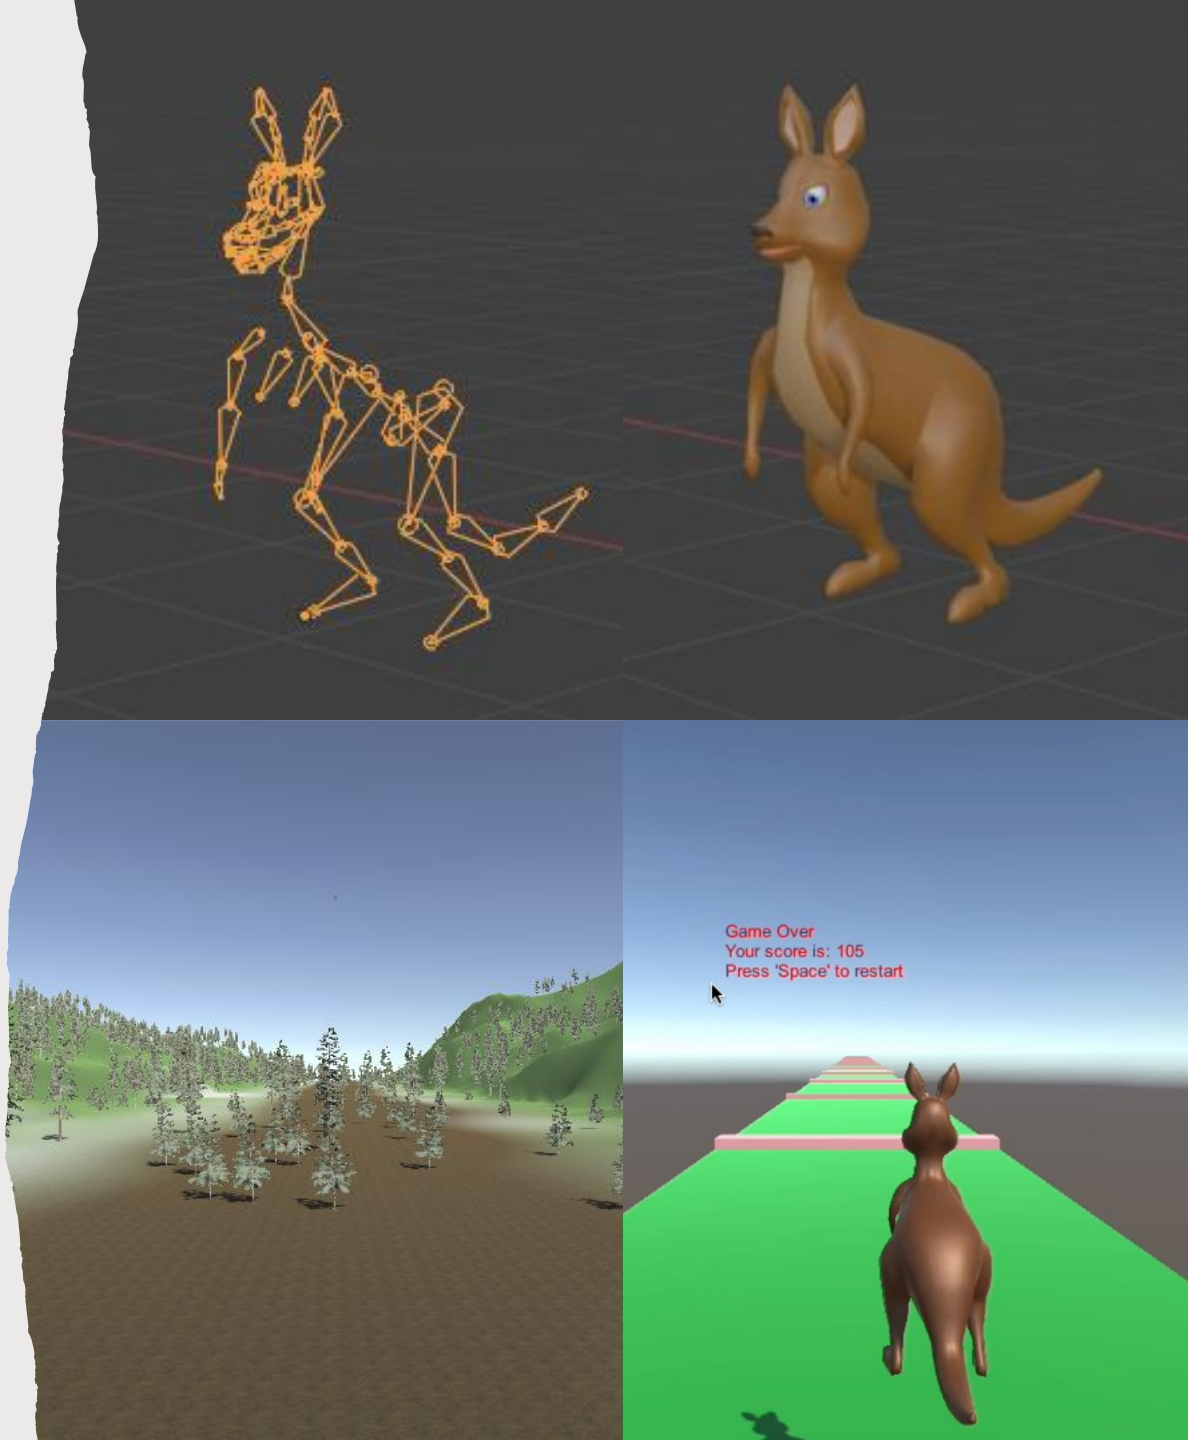
Iterative Workflow and Prototypes

Steps Taken:

- Concept Sketches:
  Initial character and environment designs.
- Wireframes:
  Basic layouts for gameplay mechanics.
- Playtesting:
  Feedback-driven refinement of obstacles and animal abilities.

Challenges:

Overcoming zero prior experience in Unity, Blender, and other tools essential for game creation.



Core Gameplay Mechanics

Player Rewards:

- Power-ups: Boomerangs, shields, and magnets.
- Achievements for high scores and special actions.

Mechanics:

- Ride animals with unique abilities: kangaroos for high jumps, emus for agility, and wombats for endurance.
- Collect artifacts and opals to unlock upgrades.
- Avoid hazards like crocodiles, bushfires, and traps.

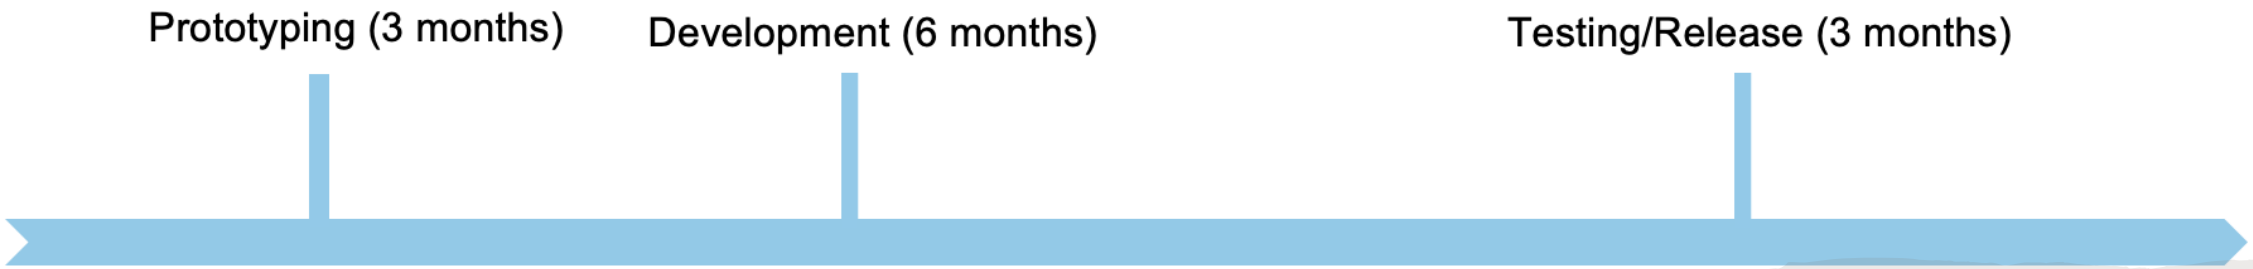
Challenges and Future Plans

Challenges Overcome:

- Designing diverse levels that maintain player interest.

Next Steps:

- Expand level designs with new biomes.
- Introduce multiplayer modes for increased engagement.



Thank you for your time
